

Amendments to the Specification:

Please replace the title with the following amended title:

**METHOD AND APPARATUS FOR ELIMINATING UNWANTED PORTIONS OF MIRROR SUPPORT IMAGES FROM PHOTOGRAPHIC IMAGES**

Please replace the second full paragraph on page 2, beginning at line 8 with the following rewritten paragraph:

Affixing the mirror to the camera is problematic, since any support structure ~~must~~ necessary necessary must appear in the device's field of view. One approach is to make this support structure transparent, by using a glass cylinder that mounts onto a standard camera lens mount. Another approach is to use a center port to support the mirror.
